

WHAT IS CLAIMED IS:

1. A notebook (1) comprising a base (2) having a front side and a rear side, as well as first retaining means (10), which, to secure a writing medium (18) of a first size to the front side of the base (2), are disposed at a first distance (8) from a first peripheral edge (4) of the same, second retaining means (22, 30, 32) being provided at a second distance (20) from the first peripheral edge (4) of the base (2), which are used to fasten a second individual writing medium (26), in the form of a sheet, having a different size than the first writing medium (18), the first retaining means including a first strip (10) of thin material which, within the span of the first distance (8), extends from a first side edge (12) to a second side edge (14), substantially in parallel to the first peripheral edge (4) of the base (2) in such a way that the corresponding edge (16) of the first writing medium (18) is slideable underneath the first strip (10), in order to secure the same to the base (2).

2. The notebook as recited in claim 1, wherein the second retaining means include a second strip (22) of thin material, which, within the span of the second distance (20), extends from the first side edge (12) to the second side edge (14), substantially in parallel to the first peripheral edge (4) of the base (2) in such a way that the corresponding edge (24) of the second writing medium (26) is slideable underneath the second strip, in order to secure the same to the base (2).

3. The notebook as recited in claim 1, wherein the second retaining means include a first and second loop-shaped band (30, 32), which is secured by its ends to the base (2) in such a way that the band (30, 32) extends at an angle to the side edges (12, 14) of the base over the corresponding corners of the second writing medium (26), in order to secure the corners of the second writing medium (26) to the base (2).

4. The notebook as recited in claim 3, wherein the first and the second band (30, 32) are disposed at a 45° angle to the peripheral side edges (12, 14).

5. The notebook as recited in claim 1,

wherein the base (2) is manufactured from a flexible material, in particular from leather or plastic.

6. The notebook as recited in claim 1,  
wherein the base (2) has a width in the range of 82 mm.

7. The notebook as recited in claim 1,  
wherein the base (2) has a height in the range of 134 mm.

8. The notebook as recited in claim 1,  
wherein the first distance (8) of the first retaining means (10) from the first peripheral edge (4) is in the range of 100 mm.

9. The notebook as recited in claim 1,  
wherein the first and/or the second retaining means (10, 22, 30, 32) are stitched to the base (2).

10. The notebook as recited in claim 1,  
wherein, in the area of the first peripheral edge (4) of the base (2), further pocket-shaped retaining means (34) are formed, into which the corresponding edge (35) of the first and second writing media (18, 22) is insertable.

11. The notebook as recited in claim 1,  
wherein, on the rear side of the base (2), a first pocket (36) is provided, into which the first writing medium (18) and/or the second writing medium (26) are insertable after being written on.

12. The notebook as recited in claim 1,  
wherein, on the rear side of the base (2), a second pocket (38) is provided, in which one or more business cards can be accommodated.

13. The notebook as recited in claim 12,  
wherein the second pocket (38) has a substantially rectangular form, and two of the side

edges of the pocket (38) are fastened to the base in the area of the bottom peripheral edge (4) of the base (2), as well as in the area of one of the two peripheral side edges (12) of the same in a way that enables business cards of different sizes to be accommodated in the second pocket (38).

14. The notebook as recited in claim 11,  
wherein one of the corners of the first pocket (36) is provided with an arc-shaped cut-out (40, 42).

15. The notebook as recited in claim 12,  
wherein one of the corners of the second pocket (38) is provided with an arc-shaped cut-out (40, 42).
